Hello Cat Daddy Games' Hiring Team,

As someone who has always enjoyed pursuing challenging activities, whether it's solving complex math problems, competing as a collegiate middle distance runner, or teaching mathematics abroad, I have found a similar sense of fulfillment in the world of Full Stack Development. With experience in React.js, Redux, JavaScript, Node.js, HTML, CSS, Python, Flask-SQLAlchemy, Express, SQL, Sequelize, Tailwind, Leaflet.js, Mapbox, and Render, I am excited to bring my skills and passion to Cat Daddy Games as a challenge seeker, problem solver, and as a Full Stack Developer.

What really sets me apart is my ability to turn complex ideas into user-friendly solutions. With my recent project experience, I have been able to utilize my skills to create various web applications, such as FootTracks, Plate-pal, and Bnb-Ria. These projects showcase my ability to work in both the front-end and back-end development and showcase my experience with login/signup functionality for users, full CRUD functionality, and integration with APIs such as Amazon AWS, Google Maps, and Leaflet/MapBox.

In addition to my technical skills, I have a Master's degree in Teaching in Secondary Education and have experience working as a Mathematics teacher at both Bishop Blanchet High School in Seattle and Chancellors School in Brookmans Park, UK. During my time as a teacher, I honed my communication skills, patience, and ability to adapt to both in-person and online learning environments. I believe these skills have also helped me become a better developer and team player.

I am excited about the opportunity to bring my skills and experience to Cat Daddy Games, and I believe that my passion for Full Stack Development and my experience in teaching math demonstrate my ability to learn quickly, adapt, and solve challenging problems. Thank you for considering my application, and I look forward to hearing from you soon.

Sincerely,
Nick Murphy
